"I have been a vegetarian most of my life. Both times when I was pregnant with my children Braddah Dave's Taro Burgers were my pregnancy craving. Now they have become our family staple."

— Bianca Shaw

"Braddah Dave's Taro Burgers have been on our menu from the start of 2012 and we are still selling out. Customers are obsessed and so is the staff."

— Megan Ohen | Java Kai Coffe House

"We love Braddah Dave's Taro Burgers! Residents and tourists enjoy them, and the company is great to work with."

— Jessica Murry | Hoku Natural Foods

Braddah Dave's Taro Burgers

Taro Burgers From The Garden Isle

Taro is highly digestible, and very low in saturated fat, cholesterol and sodium. It also is a good source of dietary fiber, vitamin E (alpha tocopherol), vitamin B6 and manganese. As an alkali producing food, it helps to balance the pH factor in the body.

Simply put a frozen Bruddah Dave's Taro Burger in a preheated pan with a tablespoon of oil and cook it for about three minutes on each side. This burger is 100-percent taro – there are no binders. The burger is squishy soft, so you'll want to eat in on soft bread and are perfect, along with crispy lettuce, fresh avocado and juicy tomatoes.

Bruddah Dave's Taro Burger is come in six-packs and two-packs, and can be found in the frozen food section. Braddah Dave's Taro Burgers benefit both you and the Kauai island farmers who grow it. Taro is the only plant food that can not be genetically modified.

You can trust that it will be healthy for your family and for the environment.

D'ARTAGNAN

EST 1985

PROTECTORS OF EXCELLENCE™

D'Artagnan was the **first to offer fresh foie gras in the United States**, and we continue to provide only the best and freshest to you. Put your trust in the company that's been **doing it right since 1985**. We get a **shipment of foie 6 days a week, straight from our farms**. Each lobe is hand-inspected to ensure the **highest quality** and 15% of the foie gets rejected during that process. Next stop for the rejects? They become other company's A-grade lobes. We have **the right foie for all your needs**, whether it's added to an existing dish, or shining on its own – perhaps in your flawless foie terrine, mousse, or torchon. Go ahead and make it part of your menu today.

Hudson Valley Foie Gras:

- Sweet flavor profile
- Corn and soy produces a firm liver perfect for searing and stunning presentation
- Cold eviscerated for a natural shape and firm texture
- For a labor-friendly alternative, we offer a sliced product. Ask your rep about it!

D'Artagnan French Style Foie Gras:

- Best suited for terrine, torchon and mousse
- 100% corn fed diet
- Hot eviscerated for a uniform, oval shape
- Exclusive to D'Artagnan, from our small cooperative of farms
- Deveined lobe available, too!

D'Artagnan Domestic Lamb

- Sheep are Rambouillet / Suffolk mix, heritage breeds known for producing quality meat.
- While the industry standard is one year old or more, our lambs are processed at just 6-9 months at a dressed weight of 50-60 lbs. to ensure consistent sizing and the most tender lamb on the market.
- D'Artagnan lambs are raised on pastures filled with native grasses, as well as snowberry bush and bluebell flowers. They are finished with a minimal grain supplement (no animal by-products). This produces larger cuts with exceptional tenderness and mild flavor.
- Never any hormones, growth stimulants, or antibiotics for natural lamb the way nature intended.
- Strict quality controls and farm-to-table traceability guarantees consistent sizing and adherence to exact butchering specifications.

Domestic & Jumbo French Quail

Domestic Quail
They're small, but they pack a wallop. Our exceptional quail are tender, with a light game flavor. These domestic quail come from a second-generation, family-owned farm that raises the Pharaoh, also called the Coturnix, breed of this delicate little game bird. Coturnix breed quail offer a richer flavor and higher moisture content than the more common Bobwhite breed.

Quail Facts:

- Family-owned farm offers a low-stress environment of spacious barns and tight control over quality and specs. Diet of corn and soybeans
- Raised to an age of 6-8 weeks and 4-5 oz in size, without any hormones, antibiotics, or growth stimulants from birth
- Semi-boneless quail are sleeve boned. After they're de-boned, a stainless steel V-pin holds open the body cavity and makes stuffing or grilling easy

French Jumbo Quail
Not an oxymoron, but a super quail, this larger bird (about twice the size) is exclusive to D'Artagnan. A small cooperative of farms in Southwest France raise our Coturnix quail, the same breed as our domestic quail. The birds are not given any hormones or antibiotics from birth, and are fed minimally-processed, non-GMO cereal grain. They're processed at 42 days, twice the industry average, and air-chilled for maximum flavor concentration and crispy skin. Processed by hand with a special technique that involves dry-plucking and waxing to remove all the pin feathers, the skin is left smooth and intact, perfect for that pan sear or for the grill.

Quail Facts:

- Quail raised in Southwest of France on a small cooperative of farms
- Raised to an age of 42 days and 8 oz., twice the size and age of other quail
- Air-chilled for concentrated flavor and crispiness

Non-GMO feed, no antibiotics or hormones from birth

Quail Eggs:
Don't forget we have quail eggs, too! They're great for amuse-bouche, hors d'oeuvres, and canapes. Use them in place of chicken eggs for a twist on classics like beef tartare, nicoise salad, or Scotch eggs. For only cents per portion, these tiny treasures are invaluable in the kitchen.
